

Product Overview

A strong, ready-to-use solution for hand sanitization and surgical scrub. This product can be used by surgeons, dentists, medical staff, and patients for effective and complete disinfection of hands before medical and surgical procedures. Based on a new formulation, this solution contains ethanol, butanediol (BDO) and isopropanol to increase its effectiveness.

Directions for Use

First wash the hands and forearms with ordinary soap and dry them completely. Apply 3-5 mL of the solution to the palm of a dry hand and thoroughly wet all areas from the fingertips to the elbows. Perform the standard scrub procedure twice for each hand, separately, for a combined minimum contact time of 90 seconds. No rinsing is required. Allow the hands and forearms to dry completely before putting on sterile gloves.

Delivery forms:

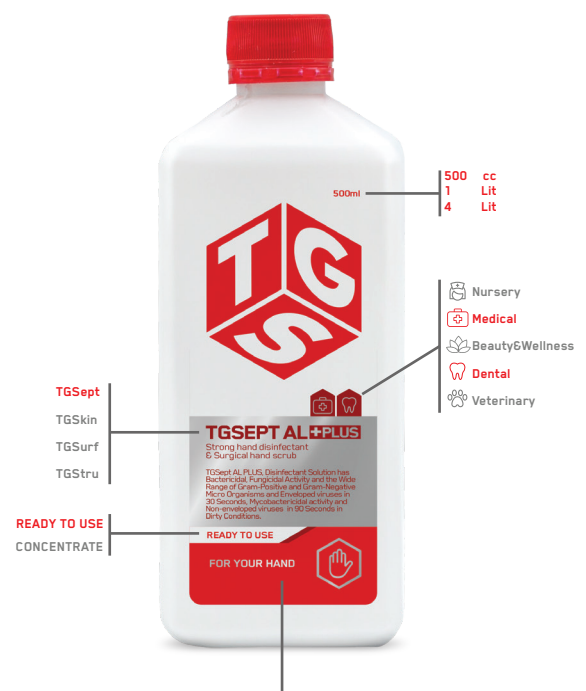

500 cc, 1 Lit, 4 Lit.

Product Benefits

- . New formulation with optimal Ethanol, Isopropyl alcohol & BDO concentration
- . Application and synergy of three types of biocides in the formulation
- . Non-toxic to tissues and low skin sensitization
- . Special formulation with moisturizer and hydrating agents to prevent skin dryness
- . Available without fragrance
- . No rinsing required
- . Environmentally friendly
- . Rapid effect on a broad variety of microorganisms
- . No sticky residue or remaining effects after application
- . Compliant with international WHO standards
- . Suitable for all skin types

Effective Spectrum	Types	Effectuated Times
Bactericidal activity (EN 13727)	Staphylococcus aureus Pseudomonas aeruginosa Escherichia coli Enterococcus hirae	30 Seconds
Fungicidal activity (EN 13624)	Candida albicans	30 Seconds
Virucidal activity (EN 14476)	Non-enveloped viruses enveloped viruses	90 Seconds 30 Seconds
